

PROJECT

July 2021

To our neighbors and friends,

During these difficult times, families and individuals can use all the help they can get. Project GO, Inc. has been offering financial assistance through the HEAP Program to Nevada and Placer County residents for over forty years. This program helps to cover the costs of high utility bills or utility shut-off notices, as well as to provide no-cost installation of energy conservation measures to reduce future utility bills.

Project GO has received additional funding from the federal government to assist with the impact of COVID-19, and we want to make sure that ALL eligible clients are made aware of the opportunity for assistance. Eligibility is based on household size and income, as listed on the accompanying flyer.

Utility assistance can be provided to pay large or delinquent utility bills up to \$1,000\* for Gas, Electricity, Wood, Propane, or Fuel Oil in Placer AND Nevada Counties.

**We request that you please post the enclosed flyers so that your clients can see them. It is our wish to assist as many eligible residents as possible.**

Sincerely yours,  
Amanda  
H.E.A.P. Administrative Assistant

\*The amount of utility assistance is based on household size/income/utility bill and other program parameters.
